Population	-	160 th
Center	-	Stepanakert
Sights	-	Amaras, Azokh cave, Bovurkhanavank, Dadivank, Gandzasar, Gtchavank, Kanach Zham, Ghazanchetsots

## Dadivank

There is a large valley in the place where Gharabagh and Mrav mountain-chains get closer by a sloppy hill (Shahumyan district of Artsakh). On that small, but very beautiful plain's central hill is built one of the remarkable constructions of Armenian architecture - Dadivank or Khutavank.

The most important construction period of Dadi temple is the first half of 13<sup>th</sup> century, when begins construction of new buildings.

Arzu-Khatun church-monument stands out like a wonderful monument in Dadi temple complex. All the other constructions are placed towards north and south-west from it. The temple was founded in 1214 by Haterk's great prince Vakhtang Barepasht's wife Arzu-Khatun.

## Gandzasar

The building of the Gandzasar monastery (Martakert district of Artsakh) began in 1216 and was finished in 1238. The foundation date of the vestibule built in its western side is unknown, but according to the inscription in here the building was finished in 1266.

From historical sources concerning 9-10cc it is known that Gandzasar's old church served as political and religious meeting place for Artsakh and the surrounding Armenian regions.

Gandzasar in a short period became an important and great hearth of region's cultural life, the seat of Eastern Armenia's patriarchate and the organizer of the national liberation movement.

## Information about the schools proposed to renovation by AEF in 2008

### Martuni region of Nagorno Karabagh, Zardashen village

1. The construction estimate exists. It has been made up by construction professionals of the region.
2. I have visited the school and looked into the construction estimate in detail.
3. The estimate includes all works to be done.
4. The school consists of small one-storey buildings. The whole school itself is a one-storey building.
5. We have proposed renovation of the whole school.
6. Now the roof is from asbestos sheeting, and it is planned to change the whole roof to zinc-coated tin.
7. The whole electricity system of the school is in poor condition – it will be repaired.
8. The school is heated by stove for wood. In the future it is planned to provide electrical heating system.
9. It is planned to repair some parts of the floor, and the other parts should be totally changed.
10. The toilets are outside the school building. They should be completely repaired. There is no water in the school area.
11. The doors will be repaired, and some of them will be changed.
12. It is planned to repair all windows.
13. The school will be plastered both inside and outside.
14. The school has been built in 1957.
15. The village population is 107.
16. 18 pupils are study in the school.
17. There are 2 teachers and executive personnel of 2 people.
18. The distance between Yerevan and Zardashen is 375km.

I think the schools must be immediately renovated. The headmaster of the school is Mrs. Rosa Arustamyan. I have an impression that after renovation the school will be taken care properly.
